

### Cable Clips with Nail

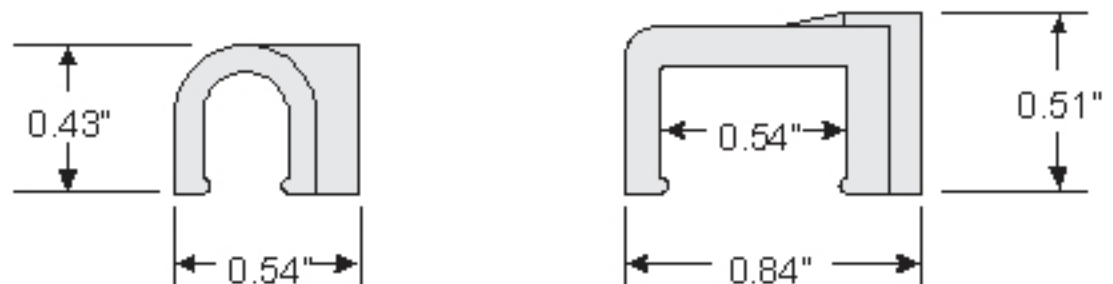

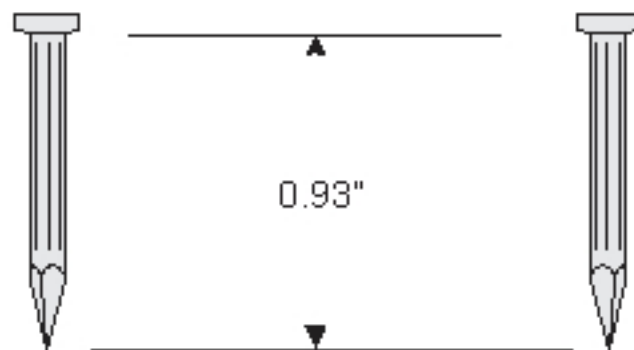

*Nail secures this clip to hard surfaces*

- ✦ Hardened nail can penetrate mortar and soft bricks
- ✦ Reduce risk of cutting coax jacket - use this clip rather than staples
- ✦ Secures coax to harder surfaces where staple guns simply don't work

UV resistant black (PE) Polyethylene plastic resin for long lifespan and security

- ✦ Clip can be removed from wood surfaces and re used if coax needs adjustment / replacement

- ✦ No 'surprise' shorts or unseen coax cable penetration as is common with staples

as specifications possible

Product Description These clips can be used where a staple gun simply cannot penetrate to get a good grip.

Hard woods, some vinyl surfaces and mortar can cause staples to fold up or simply not penetrate. The hardened nail, preinserted in each part, can be driven into these more challenging surfaces with a hammer.

Packaging 100 clips in each bag. Available in black or white.
